Tiles

LOS ANGELES  
PRESSED  
BRICK  
COMPANY

*Medals Awarded at World's Expositions to the  
Product of the Los Angeles Pressed  
Brick Company*

*San Francisco, 1915*

*San Diego, 1915*

*Seattle, 1909*

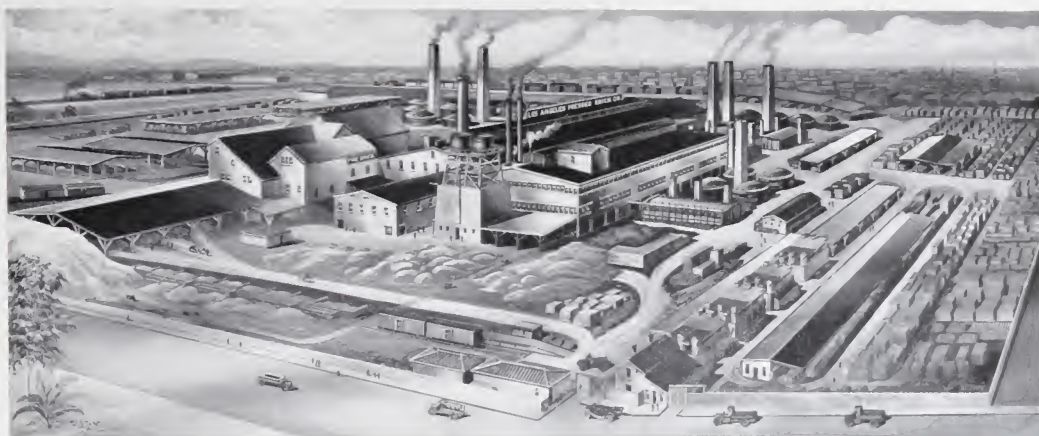

*Portland, 1905*

*St. Louis, 1904*

IN the production and use of burned-clay roofing tile California ranks as the second largest state in the Union. This remarkable showing has been accomplished since 1904, when the Los Angeles Pressed Brick Company was the first on the Pacific Coast to engage in the manufacture of roofing tile on a scale of any importance.

Today, roofing tile is used for practically every type of architecture, from educational institutions, churches and hotels, to industrial plants; from modest homes, to palatial mansions. The moderate cost of this beautiful, fireproof and enduring roof accounts for its widespread popularity.

How well we have succeeded in satisfying the requirements of the discriminating architect, we leave you to judge from the following representative illustrations and from the fact that our annual output, based on latest government statistics, is over seventy per cent of the total production in California.

THE LOS ANGELES PRESS

NO matter what type of building is contemplated a tile roof may readily be laid to conform in design and color with the structure it covers. We illustrate in this book a large variety of patterns adapted to every architectural requirement.

The colors range in shade from light to rich dark red, gray, golden and bronze, as well as glazed tile in soft green tones. Slightly variegated shades are generally to be preferred to the sameness of uniformity, as being more natural and pleasing in appearance than tile of one shade. However, we are prepared to meet any individual taste as regards shade.

There are many practical reasons for using tile roofs.

Nearly fifty per cent of conflagrations are caused by flying sparks from adjoining buildings settling on inflammable roofs which are ever a menace to life and property, as well as a source of expense for upkeep.

Besides being fireproof, a properly laid tile roof, is free from leaks, wear or repairs. The first cost is the only cost and it is the cheapest in the end.

A tile roof is a non-conductor of heat and cold, the upper story will be found as cool as the lower in summer weather.

Where quality has been considered throughout the rest of the building, the crowning triumph is a tile roof imparting that distinctive and artistic effect that nothing else can and enhancing the beauty of the entire structure.

## Specifications

### *Tile to be used*

Cover all pitched roofs with Los Angeles Pressed Brick Company's

..... Tile, using:

Ridge.....

Hip.....

Hip Starter.....

Finials.....

### *Preparation of Roof*

The general contractor shall have the roof properly prepared in every way before tile setter is sent for. The following details shall be carefully complied with: Roof shall be sheathed tight and covered with 30-pound felt, properly tacked with large headed nails. This felt shall be laid in rows with not less than 2½ inch lap starting at the eaves, over all valleys and under all flashings. All strips\* shall be properly installed. Metal valleys 24 inches wide with edges turned up at least ½ inch shall be placed over one layer of 30-pound felt. All other flashing required on the building shall be ready for installation at the direction of the tile setter.

\*See Detail on Pages 21, 23 and 25.

### *Laying*

The tile setter shall use great care in properly laying tile. All rows to be laid at right angles to the eaves and parallel with each other. Under no circumstances are the tile to be stretched. He shall cut the tile that verge along the Hip and Ridge Boards as close as possible, filling the void with cement. Hip and Ridge tile and other trim shall be properly installed after the field tile have been laid. Only expert tile setters to be employed on this work.

	Number Tile to Square	Number Pounds to Square
Small Spanish .....	220 tile	770 pounds
Large Spanish .....	165 tile	825 pounds
Small Mission .....	280 tile	1190 pounds
Large Mission .....	185 tile	1480 pounds
Special Mission .....	185 tile	1160 pounds
Granada .....	180 tile	1190 pounds
Oxford .....	225 tile	810 pounds
Shingle .....	400 tile	1200 pounds
Italian .....	320 tile	1150 pounds

*All weights and measurements given in this Catalogue subject to slight variation.*

*Allowance must be made for cutting to fit hips and valleys.*

*All designs made in uniform or variegated natural red, gray and golden shades; also green, bright and dull glaze.*
